

## Filter Element: 25-64-60K

| Technical Specification          |                                                                                |
|----------------------------------|--------------------------------------------------------------------------------|
| <b>Description</b>               | Disposable Particulate Filter Element                                          |
| <b>Materials of Construction</b> | Borosilicate Glass Microfibres bonded with Kynar fluorocarbon (P.V.D.F.) resin |
| <b>Filtration Efficiency</b>     | Better than 99.5+% removal of 0.1 micron particles                             |
| <b>Air Flow Resistance</b>       | Less than 1.0KPa at 6 m/min in air at 25°C                                     |
| <b>Dimensions</b>                | I.D. - 25.0mm ± 0.25mm                                                         |
|                                  | O.D. - 31.5mm ± 1.5mm                                                          |
|                                  | Length - 64.0mm ± 0.25mm                                                       |
| <b>Strength (dry)</b>            | Burst minimum - 0.8 Bar                                                        |
|                                  | Collapse minimum - 1.2 Bar                                                     |
| <b>Temperature Resistance</b>    | -50°C to +150°C maximum in air                                                 |
| <b>Chemical Resistance</b>       | Resistant to all mineral, vegetable                                            |
|                                  | And synthetic compressor lubricants                                            |
|                                  | Consult chemical resistance chart for                                          |
|                                  | Other gases and liquids                                                        |
