

Indoor Air Purifier FCI 5000

OurAir FCI 5000 is a high performance indoor air purifier that eliminates harmful and unwanted airborne contaminants – making your home or work space a clean and healthy place to be.

Performance that cares

- **Effective removal of multiple pollutants**
Including fine dust PM2.5, formaldehyde, volatile organic compounds (VOCs), nitrogen oxides, sulfur dioxide, ozone, hydrocarbons, bacteria, cigarette smoke, and odors
- **Superior clean air delivery rate (CADR)**
Delivering over 480 m³/h for particulate and more than 230 m³/h for formaldehyde creates a noticeably-fresh environment.
- **Zero secondary pollution**
No release of ozone and other harmful by-products that can occur with other air purifiers
- **Neutral, contemporary design**
Fits in all spaces and meets all tastes.

Multi-stage protection

OurAir FCI 5000 employs a three-layer filtration technology developed by MANN+HUMMEL for high levels of air purification.

Pre-filtration layer

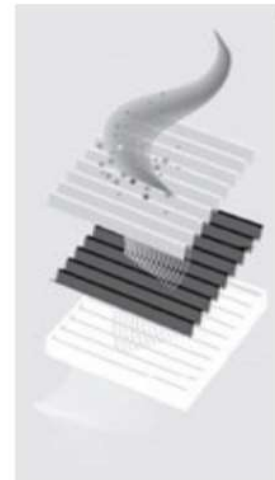

Capturing larger particles, such as coarse dust, hair and pollen.

Activated carbon layer

Removing gaseous pollutants, including formaldehyde, other VOCs - like nitrogen oxides and sulfur dioxide - and unwanted odors.

High performance layer

Trapping fine dust (PM2.5), smoke and bacteria.

Technical data

Effective coverage area	60 m ²
Sensor (to initiate the sleep mode)	Light sensor
Noise (silent mode)	39 dB(A)
Voltage	220 V - 240 V
Filter replacement indication	Yes
Filter lifetime	Up to 18 months
Max. rated power	49 W
Color	White

Dimensions & weight

Multiple operation modes

Automatic Mode

Anti-Haze Mode
